

AMSTEIN + WALTHERT

Sustainable buildings

# Green building assessment and certification

---

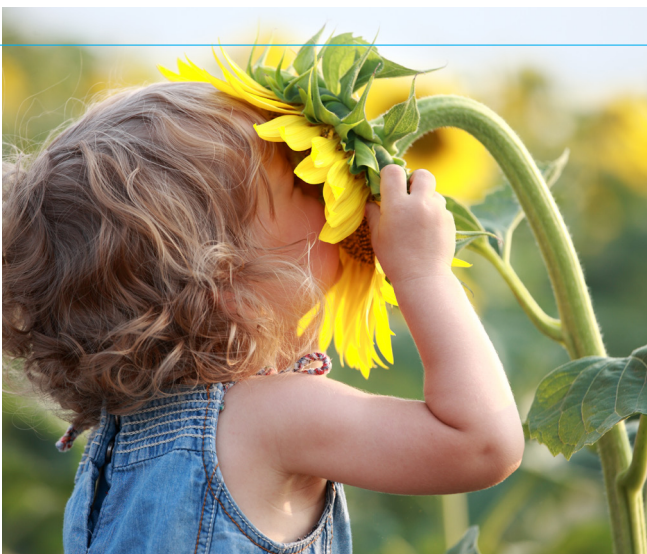

Amstein + Walther : Sustainable buildings

**We are highly concerned about the natural resources. Therefore, for years sustainability has been at the core of what we do at Amstein + Walther. We offer sustainability advice at all scales, collaborating in the design and planning of buildings, urban developments and setting up policies. Our philosophy is built upon reducing demand on resources, increasing the efficiency of their use and the focused application of renewable energy technologies, wherever appropriate. Our team is made up of accredited professionals with extensive experience in both local and internationally recognised certification programmes. Additionally, our sustainability consultants bring a great deal of expertise in low energy, low water use and healthy buildings design.**

#### Your benefits

- Healthy working / living environment provided for building users
- Improved building performance confirmed by Swiss and/or internationally recognised certification bodies
- Lower operating costs and carbon footprint
- Increased productivity of staff
- Higher rents
- Higher value of the building

## Our services

- Supporting the clients
- Setting up a strategy
- Taking care of the project in respect to sustainability and green building certification
- Engineering services (energy modelling, thermal comfort analysis, daylight simulations, acoustics, commissioning agent, thermographic surveys, measurements of air pollutants concentration, etc)
- Energy and air quality audits of existing buildings

## Current certification labels

A+W provides consultancy and assistance on all these schemes.

### SNBS

Is Switzerland's first green building certification scheme. It is divided into three parts: Society, Savings and Environment. A+W has been involved in numerous projects which achieved high SNBS ratings.

### Minergie-ECO

Is a member of the 20 year old Minergie family of certificates and aims not only on improving the energy performance of buildings, but also awards creating the healthy conditions in the buildings and reducing their environmental impact. A+W has a wealth of experience in providing advice and managing the Minergie-ECO certification process.

### WELL

Has been created in close collaboration with US top medicine doctors as a completely new concept of building rating. It entirely focuses on human health and looks at what is best for people from the perspective of each of the body systems. Our WELL Accredited Professionals will be happy to guide you through the whole process, from pre-concept studies to the building hand-over.

### LEED

Has originally been designed for the US market, but its robustness has made it one of the leading, internationally recognised green building certification schemes.

### BREEAM

Born in the UK, it is the world's oldest sustainable buildings certification system. Our in-house consultants, accredited with the certification body, are looking forward to the opportunity to work for you.

### DGNB

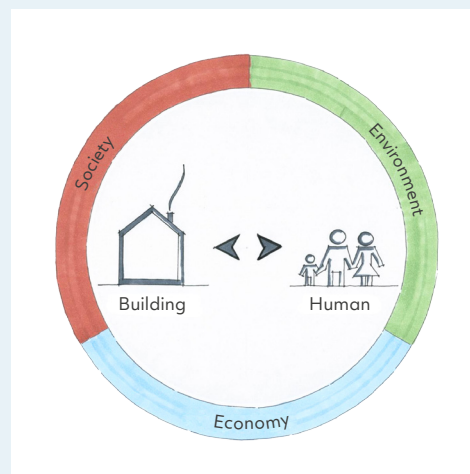

Born in Germany and converted to Swiss regulations by the SGNI company.

### FITWEL

Simple and effective tool to achieve well-being in buildings.

We can guide you through a wide choice of labels.

Human centered building

CECB labelling

Campus CGHH: certified Minergie-ECO buildings
